

ABOUT US

Fourth Light Farm is dedicated to cultivating healthy soil, nourishing communities, and sharing the joy of sustainable agriculture. We believe that the foundation of a thriving ecosystem starts beneath our feet through education, hands-on projects, and outreach, we aim to inspire a deeper connection to the land.

FUN SOIL FACTS

-  A single teaspoon of healthy soil contains more microorganisms than there are people on Earth!
-  Healthy soil helps filter water, reduce erosion, and capture carbon from the atmosphere.
-  Earthworms are natural tillers they aerate and fertilize the soil as they move.

GET INVOLVED!

Together, we can create a sustainable future. Whether you're a business looking to enhance your sustainability practices or an individual eager to make a difference.

Est. 2025

Compost Guide

Composting is a simple yet powerful way to return nutrients to the earth.

Here's how to start:

Greens

Fruit and veggie scraps, coffee grounds

Browns

Dry leaves, cardboard, straw

Moisture & Air

Keep your pile damp and turn it regularly

In just a few months, you'll have rich compost to feed your garden!

HOW WE CAN HELP

We work with schools, community gardens, and local residents to share sustainable farming practices.

Our workshops and resources empower people to grow their own food, compost effectively, and understand the vital role of soil health.

OPPORTUNITIES

We make soil science easy to understand through simple activities, tours, and classroom visits. Call or go online to learn more about what is available near you, or reach out to us if you are interested in our mission to learn more!
